

Description

Non-Flammable Dielectric Degreaser

WS 3020 G is a high-performance, non-flammable dielectric degreasing cleaner formulated for motors and electrical equipment.

Features

- Controlled evaporation to enhance cleaning and degreasing action.
- Low odour.
- Does not contain chlorinated solvents that are harmful to the operator.
- Extends equipment life.
- Leaves no residue.
- Non-conductive and non-corrosive.
- High purity.
- Effectively removes grease, oil, dirt and other contaminants.

Applications

- | | |
|--------------------|---------------------------------|
| • Electric motors. | • Compressors. |
| • Pumps. | • Switches. |
| • Generators. | • Electromechanical assemblies. |
| • Elevators. | • Wire ropes. |
| • Cranes. | • Handling equipment. |

How to use

- Spray generously and let it work depending on the level of soiling.
- Allow to dry completely before reconnecting the equipment.
- You can accelerate the drying process with dry air.
- Do not use on connected equipment.
- Can be applied using a bath and a cloth.

Technical Data

Feature	Unit	Typical value	Norm
Reference	----	WS 3020 G	----
Odour	----	Low	----
Colour	----	Transparent	----
Density at 15°C	Kg/cm ³	0.775 - 0.809	ISO 12185
Autoignition temperature	°C	280	----
Flash point	°C	63	ASTM D-93
Water solubility	----	Non-soluble	----
Aromatic content by weight	%	0,1 máx.	UV1 495
